Fiscal Estimate Narratives
COMM 3/30/2010

LRB Number	09-4566/1	Introduction Number	SB-651	Estimate Type	Original
Description Loans to manufacturing businesses for energy improvements, job creation, retooling, or clean energy production; the administration of energy utility programs; providing an exemption from emergency rule procedures; requiring the exercise of emergency rule-making procedures; and making appropriations					

Assumptions Used in Arriving at Fiscal Estimate

The bill creates a state and federal appropriation and also amends several existing state appropriations within the Department of Commerce that together form a revolving loan fund for loans to manufacturing businesses for energy improvements, retooling, or for clean energy production. Subject to applicable restrictions and unless otherwise appropriated by law, all federal funds made available to the state that could be used to assist manufacturing businesses for these purposes shall be deposited in the new federal appropriation.

Loans under the new program will be available to manufacturing businesses in Wisconsin for the following activities:

1. Implementing energy efficiency or renewable energy measures to enhance competitiveness.
2. Retooling existing facilities to manufacture products that support the green economy.
3. Expanding or establishing domestic clean energy manufacturing operations.
4. Creating or retaining jobs for workers engaged in the above activities.

Commerce must promulgate rules establishing eligibility criteria that do all of the following:

1. Set clear job creation standards for loan recipients.
2. Establish minimum energy savings that an eligible manufacturer must expect will result.
3. Give priority to existing manufacturers.
4. Ensure that loans will be made to businesses throughout the state.
5. Follow prevailing wage law requirements under s. 66.0903.

Commerce will be able to administer this program within existing spending authority and will not require any new positions.

Long-Range Fiscal Implications

Description					
Loans to manufacturing businesses for energy improvements, job creation, retooling, or clean energy production; the administration of energy utility programs; providing an exemption from emergency rule procedures; requiring the exercise of emergency rule-making procedures; and making appropriations					

Assumptions Used in Arriving at Fiscal Estimate

This bill requires the statewide energy efficiency and renewable resource program (Focus on Energy) to include components for implementing energy efficiency or renewable resource measures in manufacturing business facilities that are consistent with the objectives under the loan program. The bill requires the Focus on Energy Program Administrator to ensure coordination between the loan program and the Focus on Energy programs that are directed towards industrial and manufacturing customers of energy utilities. The bill also requires the Program Administrator to submit annual reports to the PSC and the department of Commerce regarding the energy utility programs that are directed towards such customers. In addition, the bill requires the PSC to cooperate with the department of Commerce to ensure coordination between the energy utility programs and the loan program. These duties can be absorbed with existing resources.
